

National Association of Corporate Directors (NACD), founded in 1977, is the only not-for-profit membership organization dedicated exclusively to serving the corporate governance needs of directors and boards. NACD Florida Chapter was founded in 2005 by a group of local directors to create a forum for executives and board members to share their experiences and ideas through educational events.

Director's Role in a Changing Regulatory and Economic Environment New Challenges. New Realities. New Solutions.

Corporate board members are being challenged as never before. Economic realities, stakeholder expectations, and an expected wave of regulations means "business as usual" is a nonstarter. What do you need to know? What can you and your board do to ensure continued high performance? What can you do to restore public trust? Our expert panelists will share the current legislative actions taking place on the Hill and how these will effect Boards in the coming days. They will discuss how the economic crisis has eroded public and investor confidence in corporate governance and what action American corporations must take to restore the public's trust. You will be provided an update on the global and U.S. economy - as well as within the state of Florida - and hear insights on how Boards should be reacting to these economic challenges.
